

Data Cabling

Solutions Guide

Data Cabling Guide

Why do I need data cabling?

Regardless of size, location or industry, your business relies on network cables to transport data from computers, switches and routers, making it the backbone of your telecoms and computer systems...

Choose from a comprehensive range of solutions including:

- Design and Installation
- Single and Multi-site solutions
- Contract work and retained solutions
- Voice and data projects
- Cat 5, Cat 5e, Cat6, Cat 6a and Cat 7 specifications
- Fibre optics
- Switches and Routers

Our data cabling services include a bespoke consultation with you to understand your needs and what you would like to achieve.

From an initial fact-finding discussion to stripping back your solution, or installation and ongoing support, we'll be available throughout the entirety of your project.

With a track record extending over 25 years, we have established a reputation for:

- Keeping to budget and schedules
- Keeping disruption to a minimum
- Delivering the best results from your IT network through our 'can do' philosophy

The overall process

- 1 Initial discussion
- 2 In-depth site survey
- 3 Design project survey
- 4 Project implementation
- 5 Ongoing support

Looking for a trusted partner?

Where we come in

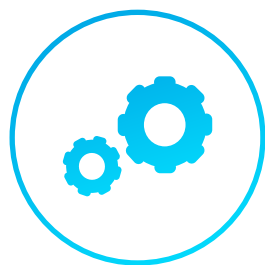

Data cabling isn't a one-size fits all solution. That's why you should consult experienced professionals to determine which data-cabling solution is best for you.

Being a trusted partner for over 10 years, we can offer specialist support in the design, installation and maintenance of your voice, security and data cabling. So whether you're looking for just one additional outlet or a large-scale project, we can help...
